OSA NOTICE NO. 1-5-48  
ATTACHMENT I

U-2R - FIELD PROGRAM STAFF

MISSION:

Under the U-2R Program Management Staff Structure:

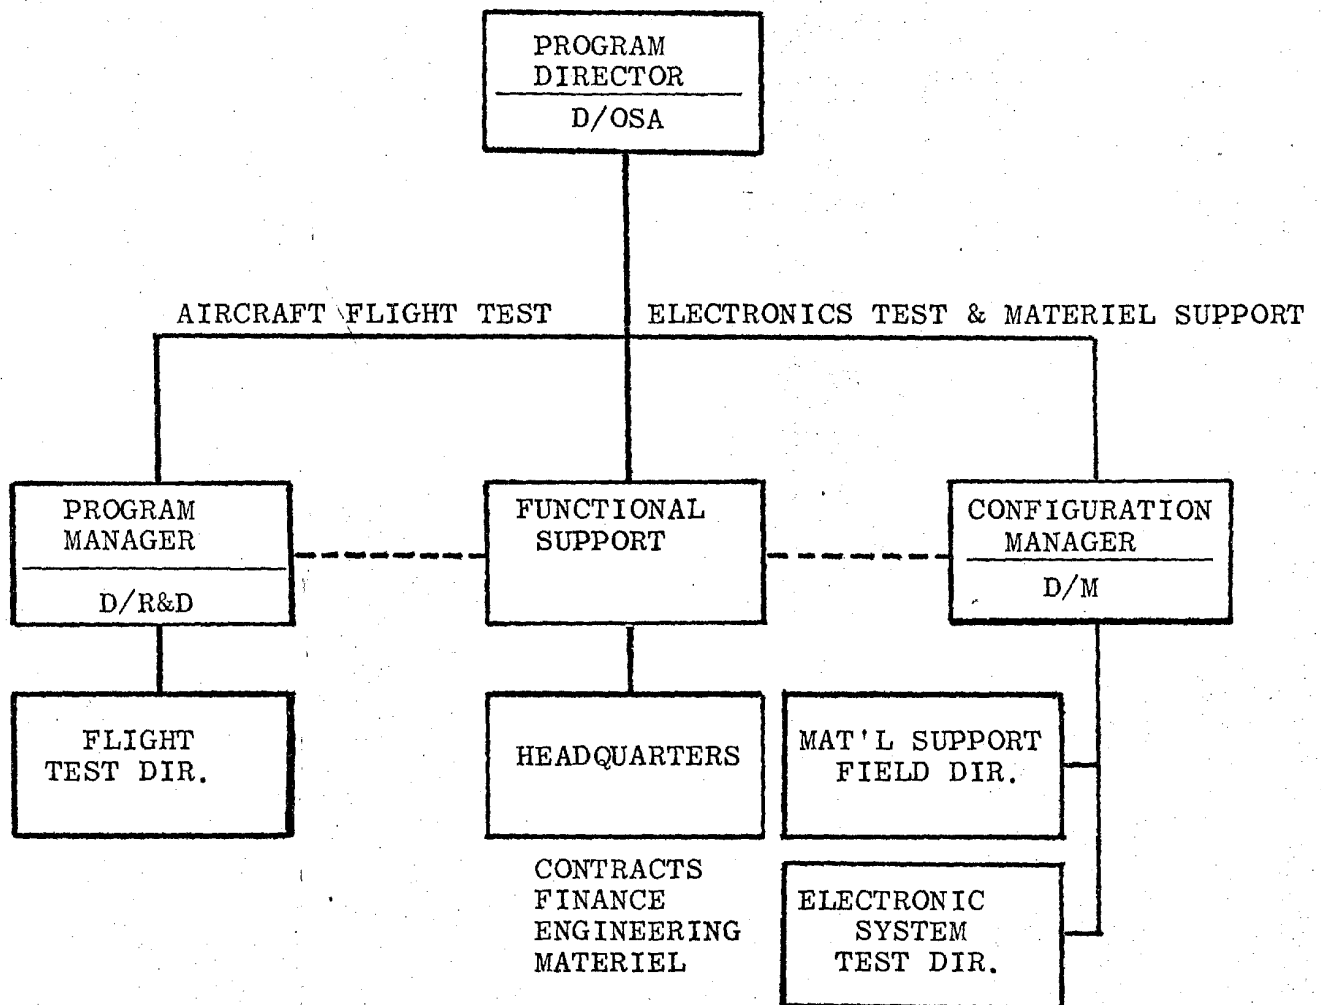

1. Provides responsive liaison services in support of the U-2R Flight Test Program.
2. Represents the OSA functional components on all matters pertaining to aircraft flight test, electronic systems, AGE, the technical documentation package and maintenance personnel training.
3. Maintains systems and engineering status management data through close liaison with contractor program managers and designated plant operations, materiel groups and procuring activities.

FUNCTIONS:

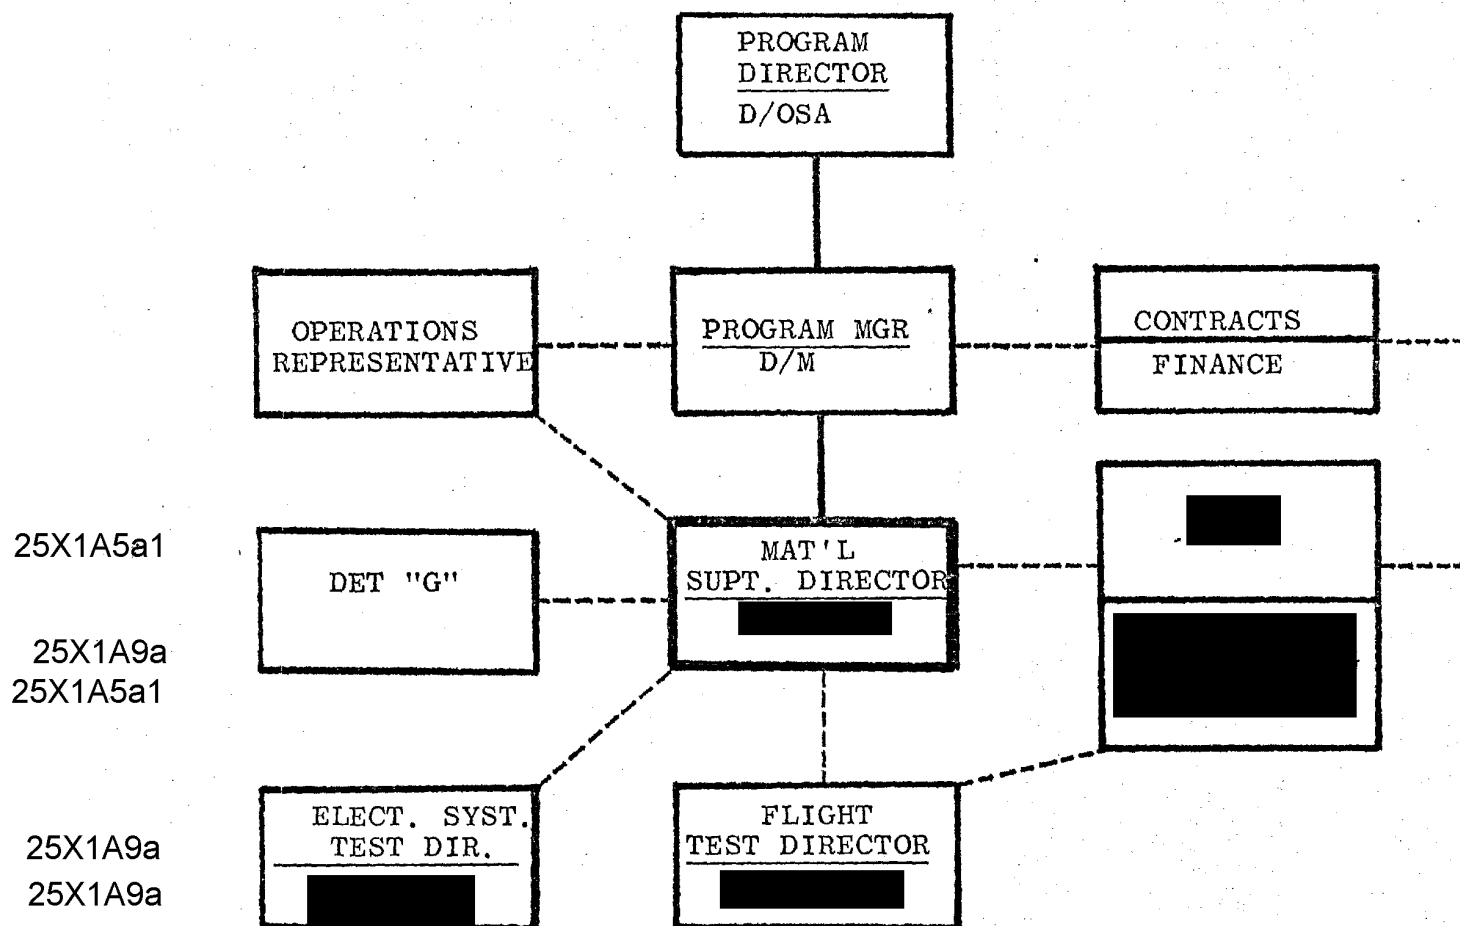

1. Responsible to their respective program elements for supporting the various functions assigned by these elements.
2. Represent the Headquarters managers on matters pertaining to the contractor's flight test program and other contractual obligations under the development program. Keeps Headquarters elements informed of programs and situations warranting special consideration and comprehensive monitoring.
3. Maintains close liaison with, and provides responsive support on systems status to program managers, operations activities, research and development organizations and OSA field activities.
4. Develop uniform and responsive reporting procedures for analysis of, and data for, systems status.
5. Coordinates with responsible contractor elements in preparing systems status management data and specialized reports to Headquarters managers and systems engineers.
